SUMMARY

AI & Data Science undergraduate at IIIT Raichur (Graduating 2026) with hands-on experience building full-stack applications using **React.js, Node.js, Express.js, and TypeScript**. Built and deployed AI/ML-powered web applications integrating LLM APIs and predictive models. Currently interning as a Backend Engineer; solved 400+ DSA problems across competitive platforms.

EXPERIENCE

Backend Intern – Node.js & TypeScript

April 2026 – Present

Infooware (Remote)

- Developing a construction ERP system using **Node.js, TypeScript, Prisma ORM, and PostgreSQL** across 10+ modules including project tracking, inventory, billing, and workforce management.
- Designed and shipped **150+ REST APIs** with clean, layered architecture (controllers, services, Prisma data layer); reduced average API response time by **35%** through query optimization and efficient schema design.
- Implemented a **Role-Based Access Control (RBAC) system** supporting Admin, HR, Finance, and Project Manager roles with secure, scalable, permission-driven access to APIs and modules.
- Modeled a normalized **PostgreSQL schema** with Prisma ORM and collaborate in an agile, remote workflow – writing modular TypeScript code, participating in code reviews, and using Git for version control.

Teaching Assistant – Design and Analysis of Algorithms

Jan 2026 – April 2026

Indian Institute of Information Technology, Raichur

- Mentoring 60+ students on algorithm design, complexity analysis, and optimization; conducted doubt-solving sessions.

PROJECTS

Job-Hunt – AI-Powered Job Portal

[Live](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, TypeScript, shadcn/ui

- Integrated **OpenRouter API with Mistral 7B** (open-source LLM) for AI-powered resume analysis – returns match score, skill gaps, and recruiter feedback against job descriptions.
- Implemented JWT authentication, role-based access for recruiters and students, and scalable REST APIs handling **200+ daily requests**.
- Deployed on **Vercel** with optimized MongoDB queries and responsive UI built with React.js and shadcn/ui.

Crime Rate Predictor – ML-Powered Web Application

[Live](#) | [GitHub](#)

Tech Stack: Python, Flask, scikit-learn, Pandas, JavaScript, REST API

- Trained and compared **5 ML algorithms** (SVR, KNN, Decision Tree, Random Forest, Neural Network) on NCRB dataset (1,520 records, 19 cities, 10 crime types); **Random Forest achieved $R^2=0.9323$** .
- Built Flask REST API and interactive analytics dashboard with city-wise risk classification and crime forecasting for 2022–2030.

Chat-App – Real-Time Messaging Application

[Live](#) | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, daisyUI

- Developed a real-time messaging platform supporting **20+ concurrent users** using **Socket.io and WebSockets**; reduced message latency by 30%.
- Built secure authentication with session handling and responsive UI; deployed on **Vercel**.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, SQL, HTML, CSS

Libraries & Frameworks: React.js, Express.js, Node.js, Flask, Tailwind CSS, Socket.io, scikit-learn, Pandas

Tools & Databases: MongoDB, PostgreSQL, Prisma ORM, Git, Vercel, WebSockets, Postman

Coursework: DSA, OOP, DBMS, Operating Systems, Machine Learning

EDUCATION

Indian Institute of Information Technology, Raichur

Raichur, Karnataka

B.Tech in Artificial Intelligence and Data Science

Aug 2023 – Present (Graduating 2026)

ACHIEVEMENTS

- Solved **400+ DSA problems** across LeetCode and GeeksforGeeks; secured **under 5000 global rank** in LeetCode Biweekly Contest.
- Selected for **Smart India Hackathon 2024 & 2025**.
- Secured **99.40 percentile** in Naukri Campus Young Turks 2025 – [Certificate](#)
